APPLICATION FOR TRANSFER
OF
NOTICE OF INTENTION
(FORM MR-TRS)

RECEIVED
APR 14 2009
DIV. OF OIL, GAS & MINING

This Application For Transfer of Notice of Intention (Application) is submitted by, (Transferor) UNICO INCORPORATED who is the current operator of Notice of Intention to Conduct Mining Operations (NOI), permit number (NOI File Number); S0170031 and by, (Transferee) BROMIDE MINING LLC who is requesting approval of the Division to assume the obligations of Transferor and to be Operator of the NOI. The Notice of Intention, Transferor, and Transferee governed by this Application are more fully identified on the attached Fact Sheet.

1. Operator agrees to transfer the rights and obligations to operate under the terms of the NOI to the Transferee, The Transferor does not intend to retain any rights to conduct mining operations within the area covered by the NOI, unless provision, 2a. is initialed.
2. The Transferor is assigning a portion of the lands associated with the NOI, and therefore subject to adherence to the additional conditions:
 - a. Initials: N/A Transferor hereby indicates that he/she intends to retain the right to conduct mining operations on a portion of the lands included in the NOI;
 - b. The Division must determine that the retained lands can be mined and reclaimed independently of the lands identified to be transferred by this Application.

- c. The lands that Transferor intends to retain and access to the lands will be clearly identified by amending the NOI and associated maps prior to Division approval of this transfer.
 - d. Both Transferor and Transferee understand that in addition to the requirements of the Transferee, the Transferor must modify or replace the NOI, and have a Division approved surety and reclamation contract before the Transfer receives Division approval.
3. Transferee and Transferor understand the transfer of the ***NOI is not complete until all the applicable requirements are met***, including the Transferee submittal and Division approval of the amended NOI, reclamation surety and reclamation contract.
 4. Initials of Transferee: KEN Transferee has read and has a copy of the current NOI and mining and reclamation plan.
 5. Transferee shall conduct mining operations on lands included in the NOI in accordance with the Utah Mined Land Reclamation Act, Sections 40-8-1 et seq., Utah Code Annotated, (2005, as amended) (hereinafter referred to as "Act"), the regulations adopted pursuant to the Act, and the Mining and Reclamation Plan (if any) and other conditions of the NOI as currently approved.
 6. The Transferee shall provide a surety in a form and amount approved by the Division or the Board of Oil, Gas and Mining (Board) to assure reclamation of the lands affected by the mining operations.
 7. Transferee assumes full responsibility to inspect the proposed site and mining operations and to be fully knowledgeable of all existing conditions. The Transferee is responsible for compliance with the conditions of the permit and the obligations regardless of the nature of the conditions at the site, the nature of the operations, and any lack of knowledge of any latent or apparent conditions.
 8. Transferor continues to be liable for compliance with all of its obligations under the current NOI until (a) the Transferee replaces or modifies the NOI as required and determined complete by the Division; (b) the Transferee executes a reclamation contract in the form provided by the Division agreeing to complete the work as set out in the NOI, the Act, and the regulations; and (c) the Transferee submits an acceptable surety and the surety is approved by the Division or the Board as required.
 9. After all of these conditions of provision 8 have been satisfied the transfer will be approved by the Division and the Transferee will be the Operator for the NOI.

The signatory below represents that he/she has authority to execute the same and that the Operator/Transferor, if not a natural person, is a properly organized entity in good standing under the laws of Utah and the United States, is registered as an entity authorized to do business in the State of Utah,. I have read the application and fully know the contents thereof; that all statements contained in the application are true to the best of my knowledge and belief.

Re: Acceptance of Amended Notices of Intention to Commence Small Mining Activities,
Bromide Basin Project, S/017/031, Garfield County, Utah

Dear Mr. Hatch:

Recently, the Division of Oil, Gas and Mining has received several amended Notices of Intention from Kaibab Industries, Inc. for their Bromide Basin project. The proposed project is located on private and BLM managed land in Sections 33, 34 and 35, T31S, R10E, SLBM, Garfield County, Utah. The Bureau of Land Management's designated file number is UTU-70595.

After reviewing your latest mine plan clarifications and performing a joint site visit with the BLM and Division of Water Rights, on May 29, 1997, the amended plans now satisfy the notice requirements of Rule R647-3 of the Utah Mined Land Reclamation Act of 1975, Title 40-8, et seq., Utah Code Annotated. Kaibab Industries, Inc. may commence small mining operations in accordance with the proposed plans in the amended notices filed with this office. It is our understanding that Kaibab will utilize a closed loop gravity separation processing circuit and recycle all processing waters with no discharge to Crescent Creek. This closed loop circuit will be used until a point source discharge permit (UPDES) is obtained from the state Division of Water Quality which would authorize the discharge of clarified water back into the Crescent Creek drainage.

Thank you for your patience and continued cooperation in helping finalize this permitting action. As always, our acceptance of your amended notice does not authorize you to commence operations without first obtaining any other required regulatory approvals or

necessary clearances. If you have any questions or concerns regarding these latest amendments, please contact me at (801) 538-5286. Please reference our designated file number S/017/031 when replying.

Sincerely,

D. Wayne Hedberg
Permit Supervisor

BROMIDE MINE AND MILL LOCATION AND SYSTEMS SCHEMATIC

Water recirculation systems for milling using mine waters.

Crecent Crk.

Using mine waters that are pumped from the mine into 2 or 3 large storage tanks allows us to have a pressurized system. water would be used for milling and then released into the pond for storage and settling before being pumped back up to the storage tanks. The pond is lined and no waters would be released into the stream.

CRECENT CREEK

Using diverted waters from a 2" cistern pipe water diversion in Crecent Crk. for initial fill-up and mill use, would create the pressurized water system needed to operate the gravity separation mill. waters would be released from the mill into the tailings pond systems and settled, then pumped back to the mill head ore station to achieve resurculation. Once enough water had been diverted from Crecent creek to fill the ponds systems for milling, only small supplemental ammounts of water would be diverted into the system to replace evaporative water losses. This eliminates water discharge from the mill into the stream.

PLAN OF OPERATIONS

(For Operations Proposed Under the 43 CFR 3809 Regulations)

Instructions to Claimant/Operator: Circle "Notice" above if operations within the project area propose to disturb a total of five (5) acres or less during the calendar year. Circle "Plan of Operations" if the proposed disturbance will exceed five (5) acres during the calendar year or if your operations are proposed in an area listed in 3809.1-4(b). Complete the form in as much detail as possible. Use maps or sketches where appropriate (maps or sketches are required for submitted plans of operations and are recommended, but not required, for submitted notices). A review of 43 CFR 3809 Regulations should be conducted prior to completion of this form and submission to the appropriate BLM office.

R10E

Proposed Operations: Describe the entire proposed operation, including all surface disturbing activities (road construction, drilling, trenching, backhoe and bulldozer exploration, mining, waste disposal, etc.). List all mechanized earth moving equipment to be used during the operation and state if any explosives are to be utilized. Describe and furnish a map or sketch, when applicable, showing existing surface disturbances, structures, facilities, etc., and the location and size of areas where surface disturbances are proposed, including existing and/or proposed routes of access. Calculate the total acreage proposed for disturbance (1 AC. = 43,560 sq. ft.).

Date Operations are Proposed to Commence as Outlined in this Submittal - (Month, Day, Year):

15 days after the date of this notice

Equipment to be used includes a V-6 car, vacuums, compressors,

Explosives will be used to extract... Total area disturbed is between $\frac{1}{4}$ & $\frac{1}{2}$ acre.

Access Routes (Existing and Proposed)

No new access routes presently intended,
We will use and maintain existing access routes
using a D6 catapiller.

Existing Disturbance and Structures

Crescent Creek mine portal,
Kimball & Turner mine portal,
~~Kimball & Turner~~, Existing access routes

Proposed Operations

Sampling, assaying, test hole drilling for additional
veins, rehabilitation of mine portals and extraction of ore
from Crescent Creek & Kimball & Turner mines. **FOR MILL SITE →**
erect security fence & a drainage structure — use for timber storage
and equipment storage and ore stockpiling. ~~MINING~~ **ON SITE**
PROCESSING
INTENDED

Proposed Completion Date

ON going project — no completion date in sight.

Proposed Reclamation: Describe the proposed reclamation procedures and other
measures to be taken to prevent unnecessary or undue degradation of the lands,
including measures to be taken if a period of non-operation is anticipated.

test holes will be reclaimed, mine portal rehabilitation
excess, existing access routes will be maintained.
no processing of ore on site so it will be
extremely clean operation.

I hereby declare that I, or persons I have authorized to do so, will complete
all necessary reclamation of areas disturbed during the course of my operations
to the standards described in 43 CFR 3809.1-3(d) and that reasonable measures
will be taken to prevent unnecessary or undue degradation of the federal lands
during operations.

Notice to Claimants/Operators:

1. A notice submitted in relation to the 43 CFR 3809 regulations does not require approval from the BLM. However, notification of such activities shall be made at least 15 days before commencing operations. Approval of a submitted plan of operations is required from the BLM prior to commencing operations. The BLM will promptly acknowledge receipt of a plan and will notify the claimant/operator of the status of the plan within 30 days of receipt.
2. Approval of a plan of operations does not constitute certification of ownership to any person named as claimant/operator herein, nor does approval constitute recognition of the validity of any mining claims named herein.
3. Information and data submitted and specifically identified by the operator as containing trade secrets or confidential or privileged commercial or financial information should be attached to a separate page and cited in the text of the notice or plan of operations. This information will be filed separately by the BLM and will not be available for public inspection.
4. Failure of an operator to file a notice under 3809.1-3 or a plan of operations under 3809.1-4 will subject the operator, at the discretion of the authorized officer, to being served a notice of non-compliance or enjoined from the continuation of such operations by a court order until such time as a plan or notice is filed with the authorized officer.
